O.M.S

Outlet Management System

you will not longer required to:

- ❑ Fax your order to your Head Quarter/Central Warehouse
- ❑ Re-enter outlet's order for Head Quarter/Central Warehouse
 - ❑ Call to outlets to find out specific item availability
- ❑ Frequently performing stock count to ensure stock visibility as well as damage/expiry items
 - ❑ Manually keep track of your stock level and re-order level
 - ❑ Manually keep track of your order arrival status
- ❑ Stay in outlet to approve your order or checking your item availability

Features:

- ❑ Efficiently manage and track inventory within store, re-order levels by store and items
- ❑ Assign role specific security to system users. Give rights for different system screens and action buttons
- ❑ Build in integration readiness to your point of sales and ERP system (order management, customer master & product master)
- ❑ View orders, inventory, receiving status and audit information in dynamic reports.
- ❑ Roll up the inventory level as well as order level to have consolidated view at the head office
- ❑ Centralize messaging system between head office, outlets & warehouses
- ❑ Block order dates based on effective order date by outlet level with cutoff time setup by outlet
- ❑ Workflow approval via smartphone
- ❑ Manage customer, inventory & order across multiple outlets
- ❑ SMS or email notification for expected receiving from central warehouse/HQ
- ❑ Lookup for product availability at the other outlets
